What I want to be when I grow up is a artist and a teacher. It's really fun to be a teacher because if your teacher just goes on with a subject that you don't really know about and you haven't practiced it with your family, it'll help you get better at math, science, or any other subject that you think of, like history or something. You can do anything you want if you just imagine it.

Back in 2016 the offer for the scholarship came up and we were very, very honored to receive it. This scholarship meant the world to us because it put her into a program that was structured. She was there for preschool and this scholarship set Savannah off on her educational journey to which today, she's in the second grade.

Savannah

You get to learn so much new stuff, and it's really fun to learn new stuff about new things, because if you didn't know that subject, you would know it now because your teacher just ran over it again.

Arthur Wayne

It's been a great opportunity and it all started with this wonderful scholarship, so shipmates get in there and get that application in by April 16th.

Savannah

Hope you like it. Bye.

Arthur Wayne

Bye. Such a ham.
