Lance Davis

I'm glad I'm getting this shot today. It'll be my first shot and, three weeks from now, I'll get my second shot. But it's about getting back to a normal life. And I'll tell you the truth, my inspiration was my mom. She's 84 and when she got the call to get her doses, she went and did it. She drove herself down to the site, she got her vaccine. She's had both doses now, and if she can do it, I can do it.

Safety is one of our top priorities with HII and with Ingalls. And this is a big safety measure and that's why I would recommend people do it.
